-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-8 are objected to because of the following informalities: in claim 1, line 1, "Apparatus" should read --An apparatus--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Spehrley, Jr. Et al. (US Patent 4,194,666).

With regards to claim 1, Spehrley, Jr. Et al. discloses an apparatus for closing a fastener, the apparatus comprising a first member 72 adapted to engage and bend a fastener 74 toward a closed position, a second member (88, 90) defining a recessed fastener guide (120, 122) adapted to engage and bend the fastener toward the closed position, the recessed fastener guide being generally aligned with the first member to receive at least a portion of the fastener guide from the first member (figure 2), structure for moving the first member (col. 5, lines 3-6), and structure 80 for moving the second member relative to the first member to move the fastener toward the closed position (col. 5, lines 10-34).

For claim 2, Applicant should note that the first and second members of Spehrley, Jr. Et al. could be moved simultaneously.

For claims 6 and 8, see col. 5, lines 49-53 and figures 2 and 3.

4. Claims 1, 2, 6, 7-11, 16 and 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Hagemann (US Patent 4,593,847).

With regards to claims 1, 6, 7, 9, 11 and 21, Hagemann discloses a media-fastener closing device comprising a first receiver (36, 37) defining a channel receiving a plurality of ends of a media fastener (fig. 2), a second receiver (80) defining a second channel 84 for receiving the plurality of ends of the media fastener from the first channel (col. 6, lines 16-22 and figure 7), a movement device 90 for moving the second receiver, and the second channel relative to the first receiver to close the media fastener (col. 6, lines 25-37). Applicant should note that the channel defined by (36, 37) is disposed on opposite sides of channels in member 80.

For claims 8, 10, 16 and 23, see figure 7.

For claims 2 and 22, Applicant should note that both means for receiving and guiding could be moved simultaneously and independently.

For claim 24, see figure 2.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3726

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spehrley, Jr. et al.

Spehrley, Jr. Et al. discloses an apparatus for closing a fastener as shown above. Although the structure for moving the first member and the structure for moving the second member in the Spehrley, Jr. Et al. reference do not comprise at least one cam defining two cam surfaces and cam followers, however it would have been obvious to one of ordinary skill in the art at the time the invention was made that the structures for moving the first and second members disclosed by Spehrley, Jr. et al. are structurally equivalent to the claimed cam and cam followers.

Allowable Subject Matter

7. Claims 17-20 are allowed.

8. Claims 3 and 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
